Join us for a Clinical Workshop

demonstrating NeuroStar® Advanced Therapy as the complete clinical solution for patients struggling with depression

Date:

**FDA-cleared, non-drug
depression treatment**

**Daily treatment
administered right in
our office**

**Proven safe and effective
across a broad range of
treatment resistance**

In Clinical Trials:

- 1 in 2 patients responded
- 1 in 3 patients achieved complete remission of symptoms

NeuroStar TMS Therapy® is indicated for the treatment of Major Depressive Disorder in adult patients who have failed to receive satisfactory improvement from prior antidepressant medication in the current episode.

The most common side effect for NeuroStar Advanced Therapy is pain or discomfort at or near the treatment site.

In an NIMH-funded, independent, randomized controlled trial, patients treated with TMS using the NeuroStar TMS System were four times more likely to achieve remission compared to patients receiving sham treatment ($P = 0.0173$, odds ratio = 4.05).
