## 2. License

With ThemeForest regular license you are licensed to use this theme to create one single End Product (the final website customized with your content) for yourself or for one client. In short:

### **What is allowed with single regular license?**

1. You can create one website for yourself or for your client and you can transfer that single website to your client for any fee. This license is then transferred to your client.
2. To sell the same website to another client, you will need to purchase another regular license.
3. You can install the theme on your test server for testing/development purposes (that installation shouldn't be available to the public).
4. You can modify or manipulate the theme; you can combine it with other works to create the End Product.
5. Theme updates for that single End Product (website) are free.

### **What is not allowed?**

1. With single regular license it is not allowed to create multiple websites. For multiple websites you will need multiple regular licenses.
2. Price Matrix WordPress installations are not allowed with single regular license.

Each regular license entitles you to use the theme in only one store (store/domain/subdomain). For multiple stores/domains/subdomains you will need multiple regular licenses.

For more information about licenses please refer to ThemeForest:

### 3.2.2. Third - party plugin

This theme may not be compatible with some third-party plugin. There are thousands of available WordPress plugin and we cannot make our theme compatible with all. Only the “default” WordPress theme is compatible with all third-party plugins, because all plugins are designed to work with it. However, nobody use “default” theme, everybody often uses custom themes. So, we are not responsible for problem when you install other plugins on our theme. We are sure that this theme compatible well with available plugins in it and if have problems with our plugins in this theme, we will have a responsibility to support for you.

This isn't something specific to our themes; this is general rule for all WordPress themes and plugins
